

2 line Customer Display

The 2 line customer display we usually supply connects to the back of the Posiflex terminal. It connects via a small USB cable it is supplied with and there is a panel you can remove on the top left on the back of the Posiflex which has a USB socket it can connect to.

Once it is connected put the files from the Posiflex customer display folder in the intouch folder on the s: drive in the Winci folder on the server.

In the program go into options and the setup tab and then click more and the customer Display options should be on the right.

First Choose which port the Display is connected too. The drop down has a list of COM ports but the Posiflex USB we usually use is at the bottom of the list.

Receipt	Kitchen	Charges	Reports	Restaurant	Order Screen	Security	Set-Up
YesPay CC Authorisation Allowed <input type="text" value="Yes"/> Print Name & Address <input type="text" value="None"/> <input type="checkbox"/> Doesn't Print Shop Copy <input type="checkbox"/> Doesn't Load Yespay				Caller ID Type <input type="text" value="3"/> Port Number <input type="text" value="7"/> Caller ID File <input type="text" value="None"/>			
VAT Standard Rate <input type="text" value="17.50"/> Rate 2 <input type="text" value="0.00"/> Rate 3 <input type="text" value="0.00"/> <input type="checkbox"/> Refunds are Standard Rate <input type="checkbox"/> Pizzas Vat Rate 0 <input type="checkbox"/> All Standard Rate <input type="checkbox"/> "Hot" Button Adds Standard Rate VAT <input type="checkbox"/> Restaurant Service Charge Is VAT Exempt				Customer Display 1 Port No. <input type="text" value="None"/> Type <input type="text" value="2"/> 2 Port No. <input type="text" value="None"/> Type <input type="text" value="None"/>			
Euro Exchange rate <input type="text"/> <input type="checkbox"/> Display on Receipt Currency Symbol <input type="text" value="£"/>				MSR Reader - Driver Port No. <input type="text" value="None"/>			
Map Co-ordinates Bottom Right <input type="text"/> Shop Cell <input type="text"/> X <input type="text" value="0"/> Y <input type="text" value="0"/> Scale (meters) <input type="text" value="0"/> Print Distance on Receipt <input type="text" value="Yes"/>				Show Courses Days/Time <input type="text"/>			
Target Screen <input type="checkbox"/> Visible Make Time <input type="text" value="0"/> Out Door Time <input type="text" value="0"/> Delivery Time <input type="text" value="0"/> <input type="checkbox"/> Upload							
				<input type="button" value="Abort"/>		<input type="button" value="Save & Exit"/>	
				<input type="button" value="More"/>			

Then choose the type of Customer Display from the drop down. The list comprises different types of Customer Display but the one we usually use is the USB HID choice on the list.
