The Menu section of internet options

The Menu section of Internet Options has options to do with how you menu appears online.

The "Course Order" drop down dictates how the the courses are displayed online.

- The "As Entered" choice just displays the courses as entered in the program.
- The "Moveable" choice
- The "As Table" choice uses the table pictured below and will put the courses entered in the table in the course drop down in the internet box on an item in menus.

The "Order in Course" drop down dictates where an item is in the course on the internet.

- The "Position" choice just uses the on screen position of an item to choose where it appears on the internet.
- The "Colour" choice
- The "Number in Description" uses a number put in the description of the item to place it in a particular place in a course on the internet.
- The "Entered Number" choice puts a number box in the internet box on each item in menus and this number then dictates where an item appears on in a course on the internet.

The "Meal Deal Toppings = 0 for courses >1" option if ticked doesn't allow toppings on courses other than course 1, which is usually the pizza's, for meal deals.

The "Half/Half not Allowed" option if ticked doesn't allow Half/Half pizzas online.

The "No Cooking Instructions List" option if ticked doesn't display the list of cooking instructions from the shop online.

The "Topping use Button Description" option if ticked uses the button description online rather than the receipt description.
