The Promo Code section of internet options

In this section you can set up how a promo code works for online orders.

For setting up the actual promo code please give us a call.

The message section can be filled in with a message to display when the promo code is used.

The "Applies to" drop down has 5 choices.

- If the "-" is chosen
- If the "All" is chosen then the promo code applies to the full order.
- If the "Not Internet Order" is chosen
- If the "All Deliveries" is chosen then just deliveries work with the promo code.
- If the "A/C payment method only" is chosen

The "Expiry" drop down specifies when the promo code expires. It shows 7, 14, 21 or 28 Days.

The "Minimum £" box allows you to set the minimum amount that need to be spent for the promo code to work.

The "Discount" box allows you to set an amount or if the % box is ticked a percentage.
