The Times section of internet options

This section is where you set the opening and closing time for online ordering and what pop-up messages you want to be displayed.

When you first go into the internet options this is the first page you will see and the button for it is at the top of the list on the left of the screen.

image-1683893098855.png

The opening hours are inputted in 24 hour clock, the first time on each day is the opening time and the second is the closing time. If the closing time is after midnight then the number entered can be higher than 2400 (So 2500 is 1am and 2600 is 2am for example).

The mid day closing times only need to be entered if you open at lunchtime and then close for a period before opening again. So if you are open at lunchtime but then are closed from 2pm until 4pm you would enter 1400 in the first box and 1600 in the second box.

The "Below Minimum Spend of" box is to enter the minimum spend for online orders and the message below that will appear in a pop-up if the customer tries to place an online order below the amount you have entered.

The "Before Order" message is if you want the customer to receive a pop-up before the order.

The "After Order Completed" message is if you want the customer to receive a pop-up after the order.

The "Closed Message" is what the customer will see if they try to place an online order outside the times you have set.

The "Home Page Header Title" is the message the will appear on the top line of the customer web browser.
