# Adding a New Customer without using a Postcode

Sadly, not all customers know their postcodes. If you are speaking to a customer who does not know their postcode, complete their name as described above, and then touch the Address field.

Type in the the details the customer gives you for their address.

When you have completed the customer name and address, touch the Accept button and the program will take you to the Order screen where you will see that this customer’s details now appear.
