Change Pizza

As you move up the order and highlight different food items, you will notice that when a pizza is highlighted, and the Order screen displays Toppings, then the button shown below appears at the bottom of the screen.

If you have ordered a pizza by mistake, or the customer changes their mind, highlight the pizza to be changed and touch **Change Pizza**. The program will now expect you to select the replacement pizza in the normal way, i.e. by touching Pizza Size and then Pizza Description, or by touching Pizza description and then Pizza Size.

If the pizza that you are replacing had extra toppings, the program will leave those toppings unchanged unless you use the **Toppings** button to remove or add to them. *Again, changing a pizza in this way is only worth doing if it takes less time than deleting a pizza and ordering a new one.*
