Stock

Stock makeup, Stock Control and other things linked with stock.

- Stock Makeup
- Stock Control
- How to set stock item with courses as 'Out of Stock'

Stock Makeup

You can say what dishes are made up of and how much of each ingredient is in a dish.

First to set up the ingredients go to management

Management.png

Image not found or type unknown

Then Occasional menu.

Occasional Menu.png

Image not found or type unknown

Then Menus

Menus.jpg

Image not found or type unknown

Then the raw ingredients button at the bottom

stock makeup 1.jpg

Image not found or type unknown

Click on a blank button and you will be asked if you want to create a raw ingredient and press yes, give it a name then click on the detail tab.

In the details tab you will have some blank fields to fill in.

The Unit Name is either the weight unit of the ingredient or if it is an item you use a quantity of the the unit name is usually set at each.

The Units Per Pack is to say how many of the units above of the ingredient are in the pack you buy.

The Price Per Pack is the price you pay for the pack.

The Pack name is the name of the pack of ingredients.

The first example here of Burger Buns shows an item that is used individually. The unit name is each. The Units Per Pack is 48. The Price Per Pack is £15 and the Pack Name is bag.

stock makeup 2.jpg

Image not found or type unknown

The second example here is Burger Sauce shows an item that is used by weight. The unit name is g for grams. The Units Per Pack is 5000 as the are 5000g in the pack. The Price Per Pack is £5 and the Pack Name is Jar.

Image not found or type unknown

Ingredients that are used individually if entered correctly should be tracked accurately. Ingredients that are used by weight will give a more theoretical figure as you are less likely to weigh an ingredient each time it is added to a dish.

To finish setting up Stock Make-up press the stock make-up button on occasional menu.

stock makeup 4.jpg

Image not found or type unknown

You will then see a new table that has the raw ingredients you created and the pizza toppings.

stock makeup 5.jpg

Image not found or type unknown

There are two drop down choices at the top Pizzas and stock items. The pizza one defaults to *Extra Toppings and the Stock Items One is Blank. If you click on one of the drop down menus it will show all the dishes from the menu. If you choose one you can then enter the amount of each ingredient is used in a dish.

In the example below Cheese Burger has been chosen in Stock Items drop down menu and the

quantity of each ingredient has been entered for that item, The cost shown is based on the value of the ingredients you entered on their setup.

stock makeup 6.jpg

Image not found or type unknown

Stock make-up can also be used for online to say what toppings are on each pizza. To do this choose each pizza from the Pizzas drop down menu.

In the example below a Hawaiian Pizza has been chosen and for each pizza size a 1 has been entered against the toppings included in this pizza.

Stock Control

First go into Management

2021-05-27 10_38_41-.png

Image not found or type unknown

Then Occasional Menu

occasional menu.jpg

Image not found or type unknown

Then Menus

Menus.jpg

Image not found or type unknown

Click on a stock item and its costings Tab at the top right of the screen

Costings.jpg

Image not found or type unknown

If the "stock control Item" box is ticked then the item will appear in the stock control list.

If an item has choices (So a button called can that has different flavours) you have to click on each flavour then costings and tick it.

Costings2.jpg

Image not found or type unknown

Click finished until you get back to the occasional menu and the go into Stock Control

Costings3.jpg

Image not found or type unknown

On the net page click Next

Costings4.jpg

Image not found or type unknown

All the items that are Stock control items will appear in the list

Costings5.jpg

Image not found or type unknown

If you put the amount in stock for all the items and then update it will come out of stock control and if you go back in the amount you put in count will now be in the Quantity column.

If the quantity column already has a figure in this can be because the program has been tracking how many of this item has been sol in the past. You can set all the items to zero by pressing the button and it will come out of Stock control and if you go back in everything will be zero and you can put the new stock total for the item in the count column.

When you press update or reset all to zero it will show the following screen.

Costings6.jpg

Image not found or type unknown

The different columns on this screen can show different figures.

- The Start column shows the starting figure of stock for the item
- The Deliver column shows the amounts of any stock deliveries received since last time it was updated
- The Used column shows how many of each item were used
- The Waste column shows how many of the items were entered as waste if that is enabled
- The ideal column shows what the stock level should have then been
- The End column shows what was entered in the count column
- The Var column shows the variance, So the difference between the ideal and what was

entered in the count

When you click finish it will go back to the occasional menu,

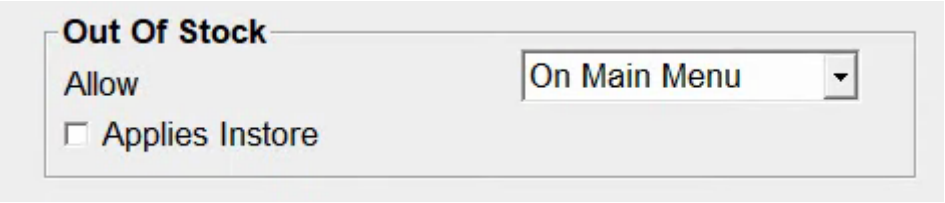

How to set stock item with courses as 'Out of Stock'

For this example, I've created a burger with several options (Size, Salad, Sauce & Cheese):

Button Text		Receipt Description	Price	Price 2	Item	Q2	Internet	X
Brett's Burger		Brett's Burger					On Screen Tab	☐
Regular		Regular Brett's Burger	5.00			111	Regular	☐
Large		Large Brett's Burger	6.00			111	Large	☐
+All Salad		All Salad				213	All Salad	☐
+Cucumber		Cucumber				213	Cucumber	☐
+Lettuce		Lettuce				213	Lettuce	☐
+Onion		Onion				213	Onion	☐
+Tomato		Tomato				213	Tomato	☐
+No Salad		No Salad				213	No Salad	☐
+All Sauce		All Sauce				312	All Sauce	☐
+BBQ		BBQ				312	BBQ	☐
+Garlic		Garlic				312	Garlic	☐
+Ketchup		Ketchup				312	Ketchup	☐
+No Sauce		No Sauce				312	No Sauce	☐
+Cheese		Cheese	0.50			401	Cheese	☐

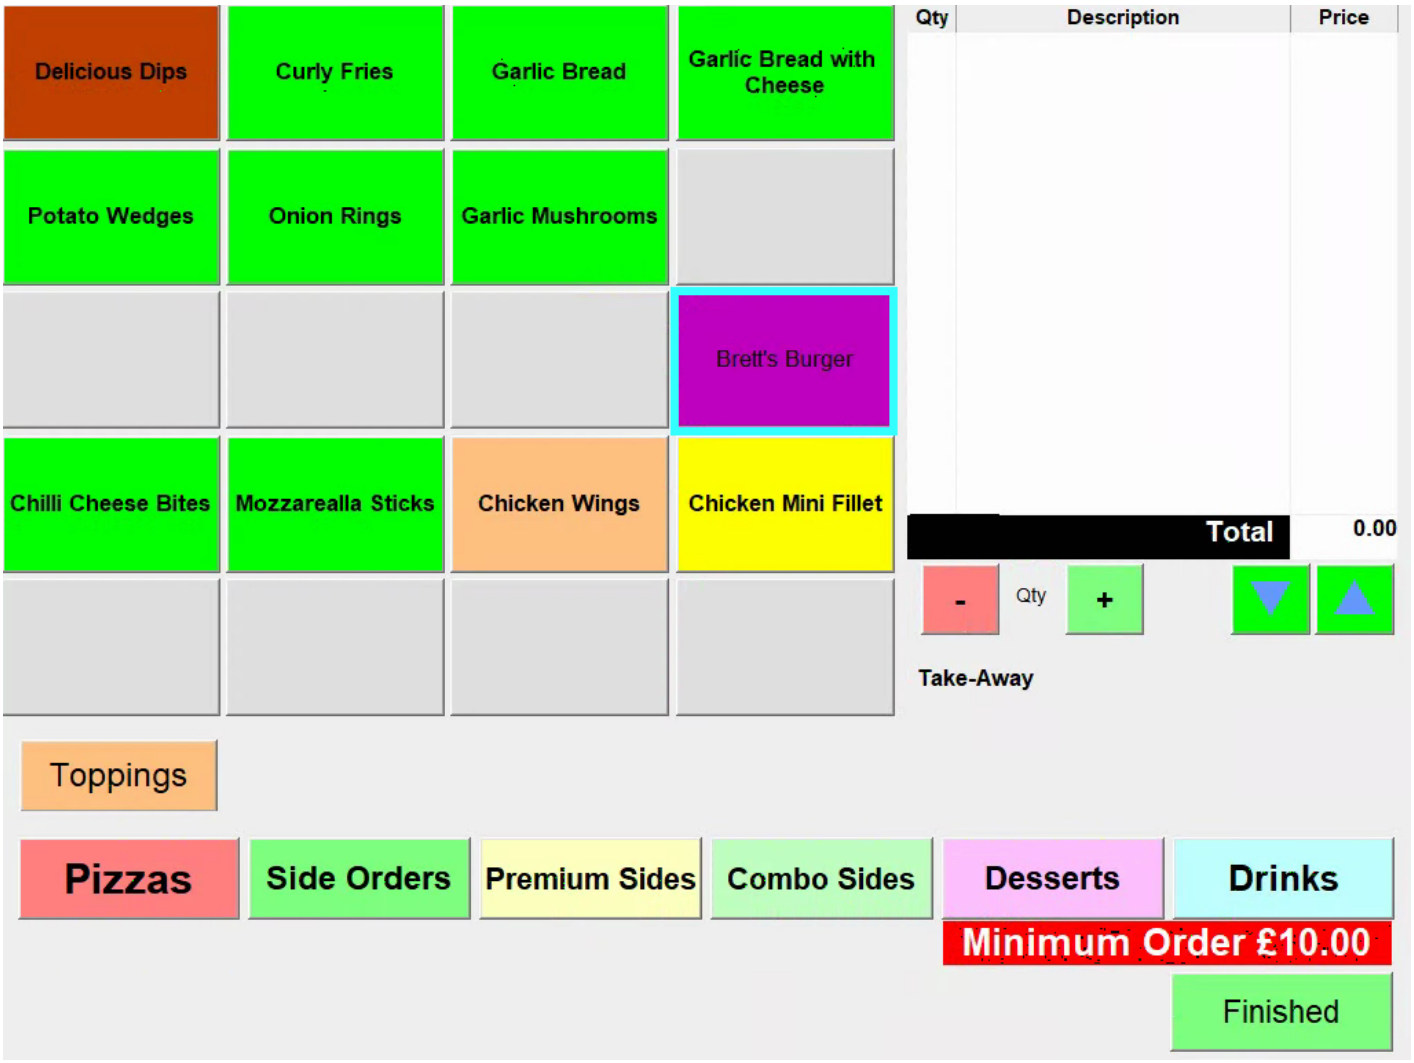

1. (If 'Out of Stock isn't enabled) Enable 'Out of Stock' on the Main Menu / Management screen:

Navigate to the **Internet Options > Sundry**

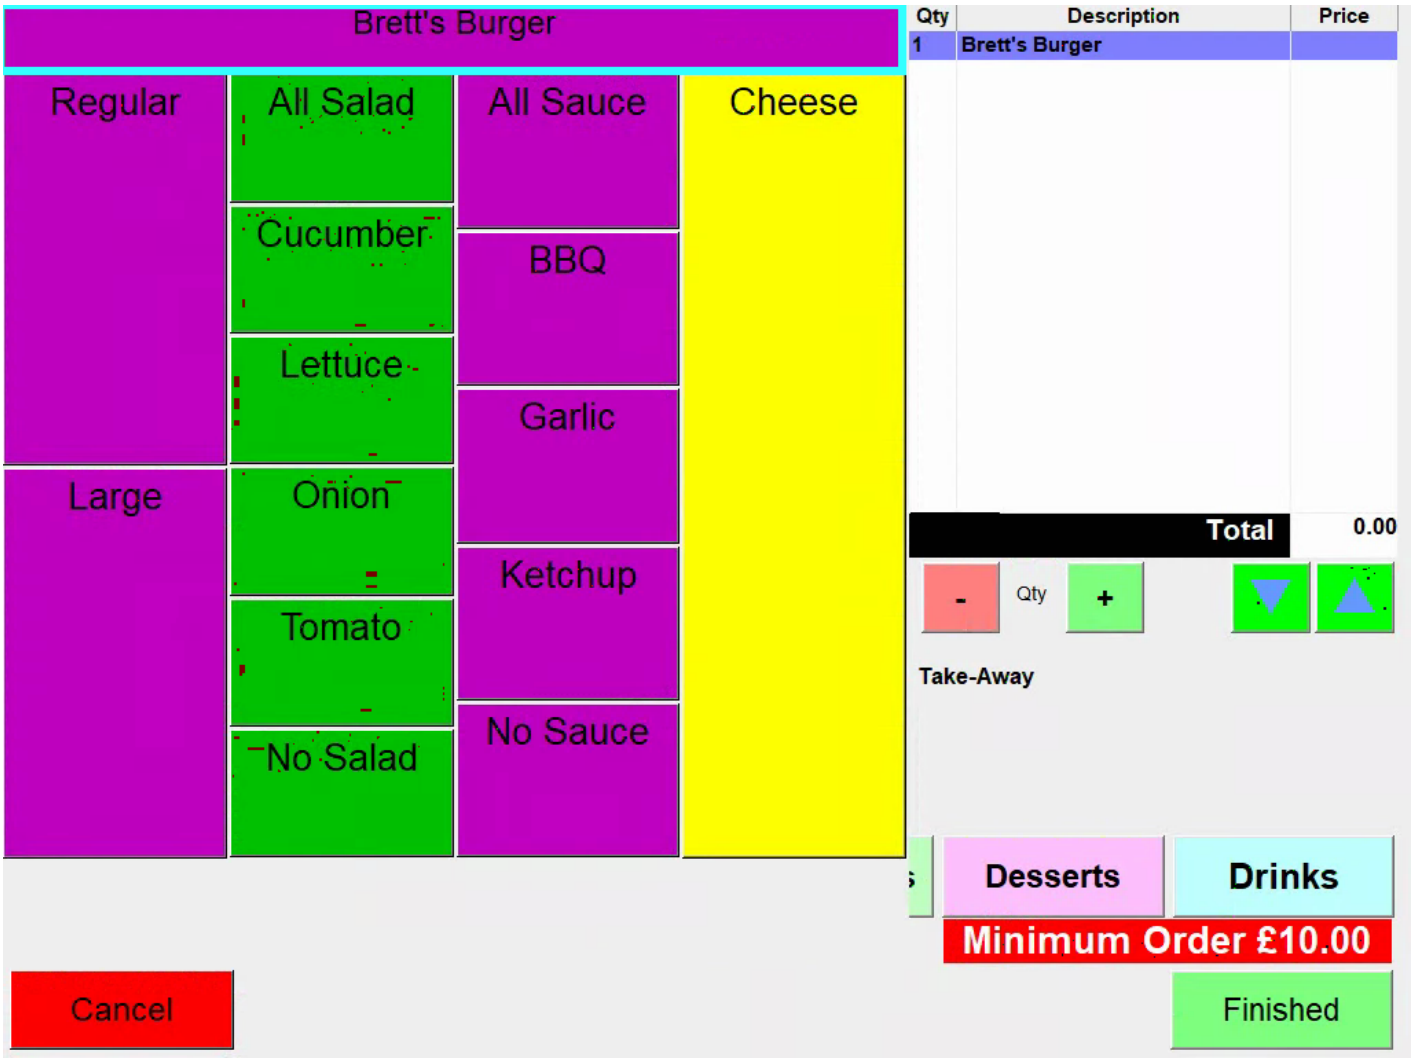

2. Navigate to 'Out of Stock', which will either be on the Main Menu, or Management screen, depending on the sundry settings.

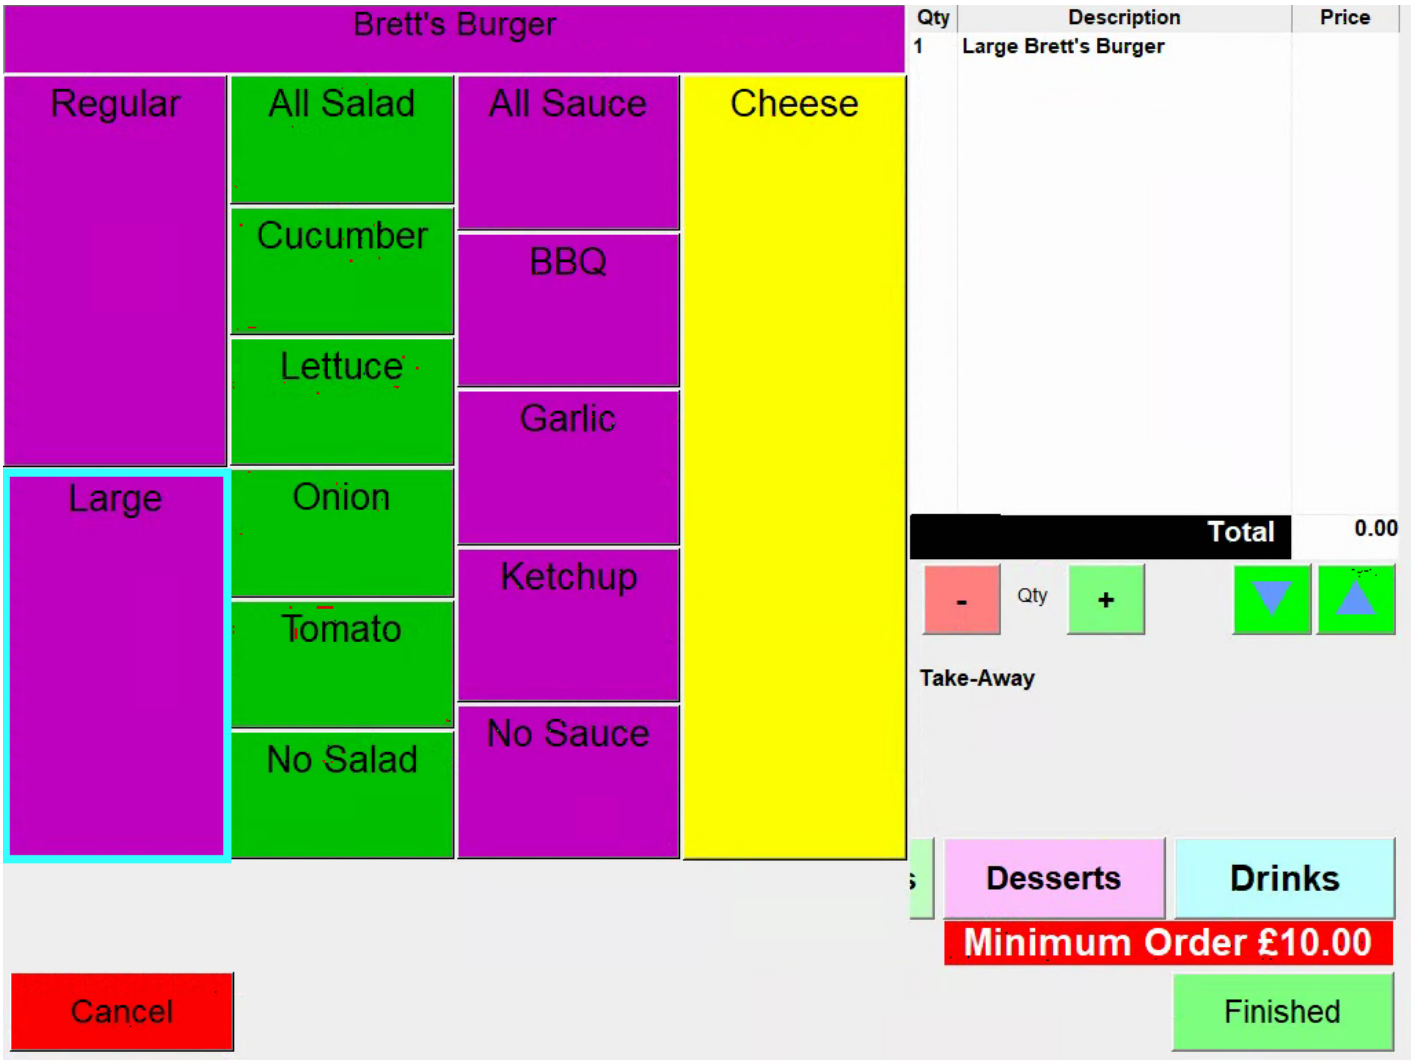

3. Select the item:

Then if they want the entire item set as 'Out of Stock', press the name at the top:

Of course, this would be the same if the 'Large' was out of stock, but the 'Regular' wasn't:

Hope that helps!

-Brett
