If you click on here you will be presented with the table layout.

The image displays a graphical user interface for creating a table. On the left, a 4x4 grid of 16 green circles is shown, numbered 1 through 16. To the right of this grid is a separate green circle labeled 17. Below the grid are four buttons labeled Area1, Area2, Area3, and Area4. At the bottom left, there is a red button labeled Finished. On the right side, there is a control panel with a dropdown menu for 'Area' set to 'Area1' and a color selector for 'Colour' set to green.

If you click on Table it will be highlighted and you can choose the name of the table, the colour, size and Shape.

The interface displays a 4x4 grid of 16 numbered green circular tables. Table 1 is highlighted with a thick black border. A mouse cursor is positioned over table 14. To the right of the grid is a control panel for table 17, which includes a text input for the name (set to '1'), a color selection bar (set to green), and a size selection control with a blue double-headed arrow. Below the grid are four green buttons labeled 'Area1', 'Area2', 'Area3', and 'Area4'. A red button labeled 'Finished' is located at the bottom left.

Clicking and holding on a table will let you drag it into position so you can make the layout look more recognisable to your staff. Any tables that are not needed can be dragged to the top right or if you want to add tables you can drag them onto the layout from here.

The image displays a restaurant layout software interface. The main workspace contains a 3x4 grid of 12 numbered tables (1-12) in a light purple color. To the right is a control panel with a circular table preview (13) in green, a table configuration panel (Name: 13, Colour: green, Size: adjustable), and a table shape selector (radio buttons for oval, circle, square, rectangle). Below the grid are four area selection buttons: Area1 (purple), Area2 (green), Area3 (green), and Area4 (green). A 'Finished' button is in the bottom left.

You can also have different areas for the restaurant (eg upstairs and downstairs). If the areas are left blank they won't appear once you go into the restaurant section.
