Right clicking the Occasional Menu button to Resize all Buttons

If you go into Management.

And then right click on Occasional Menu and a pop up will appear saying "Resize all Buttons" and if you press yes all the buttons on the menu will be changed to a small font.

This can be useful if the buttons have been messed up somehow,

Reformatting the menu

If a menu is damaged somehow the first thing to try is to reformat it.

If you go into the menu and click in the grey space below the items and above the courses.

The screenshot displays a menu management interface. At the top, there is a grid of menu items organized into four rows and four columns. The first row contains crust options: '12"', '12" Stuff Crust', '12" Kebab Crust', and an empty white cell. The second row contains pizza toppings: 'Margherita', 'Veg Supreme', 'Peri Peri Chicken', and 'Chicken Tikka'. The third row contains other pizza varieties: 'Keema', 'T's Special', 'Turkish Delight', and 'Lamb Balti'. The fourth row contains more pizza options: 'Donner Pizza', 'Pepperoni Passion', 'Seekh Kebab Pizza', and 'Meat Feast'. Below this grid is a large grey rectangular area, which is circled in blue. At the bottom of the interface is a navigation bar with seven main categories: 'Pizzas', 'Smash It & Basic Burger', 'Pak Pak & Peri Peri', 'Donner & Parmesans', 'Kids Meals & Sides', 'Drinks', and 'Desserts'. Each category is represented by a colored button with a corresponding letter below it (A through G). Below the navigation bar is another row of buttons for various menu management functions: 'Finished', 'Toppings 1', 'Staff', 'Cooking Instructions', 'Reasons', 'Expenses', 'Raw Ingredients', 'Restaurant Tables', and 'Meal Deals'.

If you choose yes the buttons on this course will be re-written. This can also be done on the meal deals section and solves any problems there.

Pressing and holding the Intouch logo on management

Pressing and holding the Intouch logo on management does the same as the online support button in occasional menu and downloads the TeamViewer client.

This can be useful on Terminals if they don't have TeamViewer installed as they don't usually have the occasional menu
