Changing the "Select one option" text on choices.

To do this, make sure the item is set as "Table" and has the correct numbers within the Q2 column.

By default, this is what it will look like - notice how it says "Select one option":

image-1627471929487.png
Image not found or type unknown

To change this, it is done within the description box of an item. Navigate to this by clicking, Management > Occasional Menu > Menus

Click on the item you would like to have the choice text changed, and click the description box.

My example item has 5 choices: Main topping, Sides, Marinade, Sauce and Extras. Therefore, I would like my

text for each choice to say:

- "Main"

- "Choose up to 3 Sides"

- "Choose a Marinade"

- "Any Sauces?"

- "Any Extras?"

This is what I put in the description box for this:

image-1627472891086.png

Image not found or type unknown

Start the line with " [++ " without using any spaces, separate the choices with " ; " and then put this "] " at the end.

Something to note: The " ; " will drop anything following it down an option.

Once uploaded it will look like this:
