# Half Pizza charges

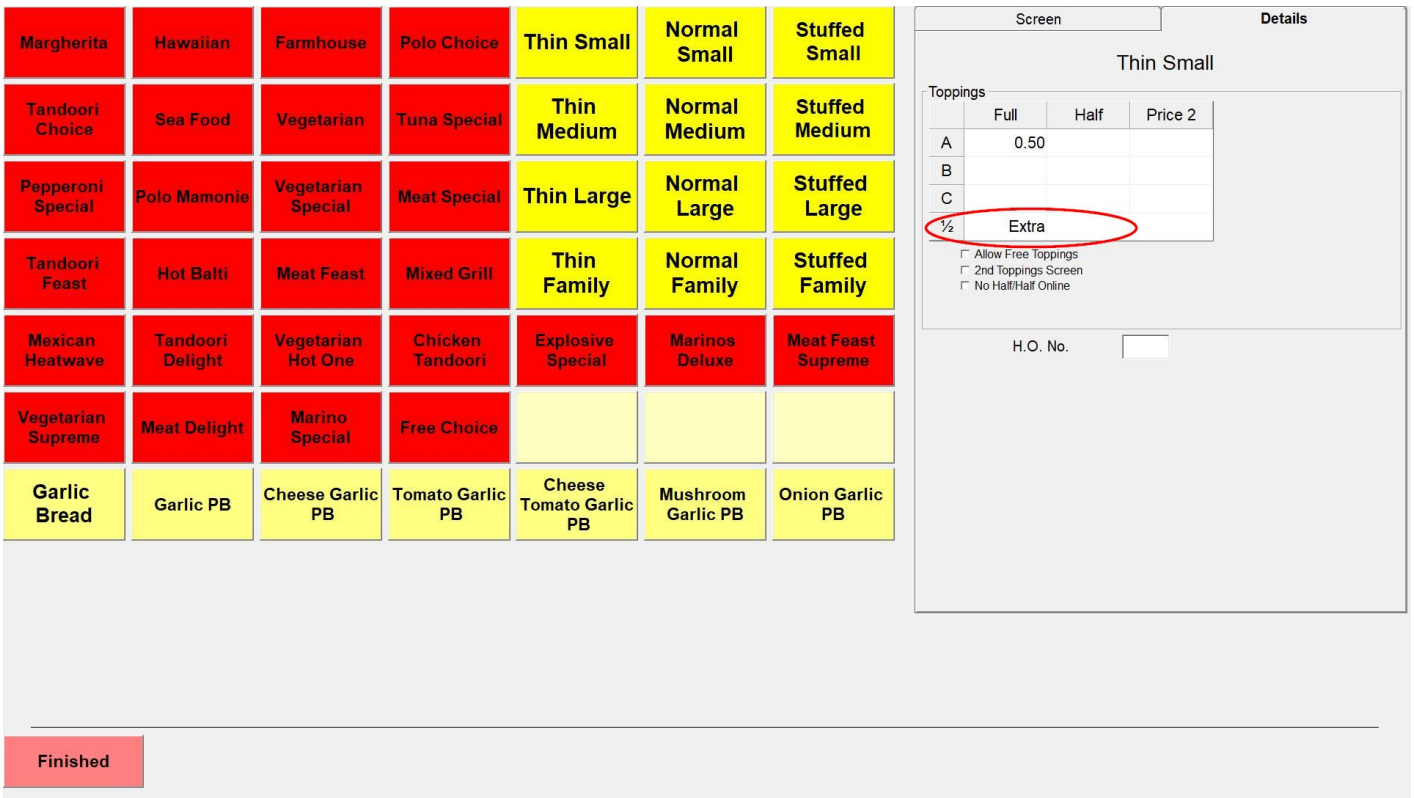

If you press a pizza and a size a half button appears and you can specify the 2nd half to be another of your set pizzas.

The 2nd half appears in red on the screen.

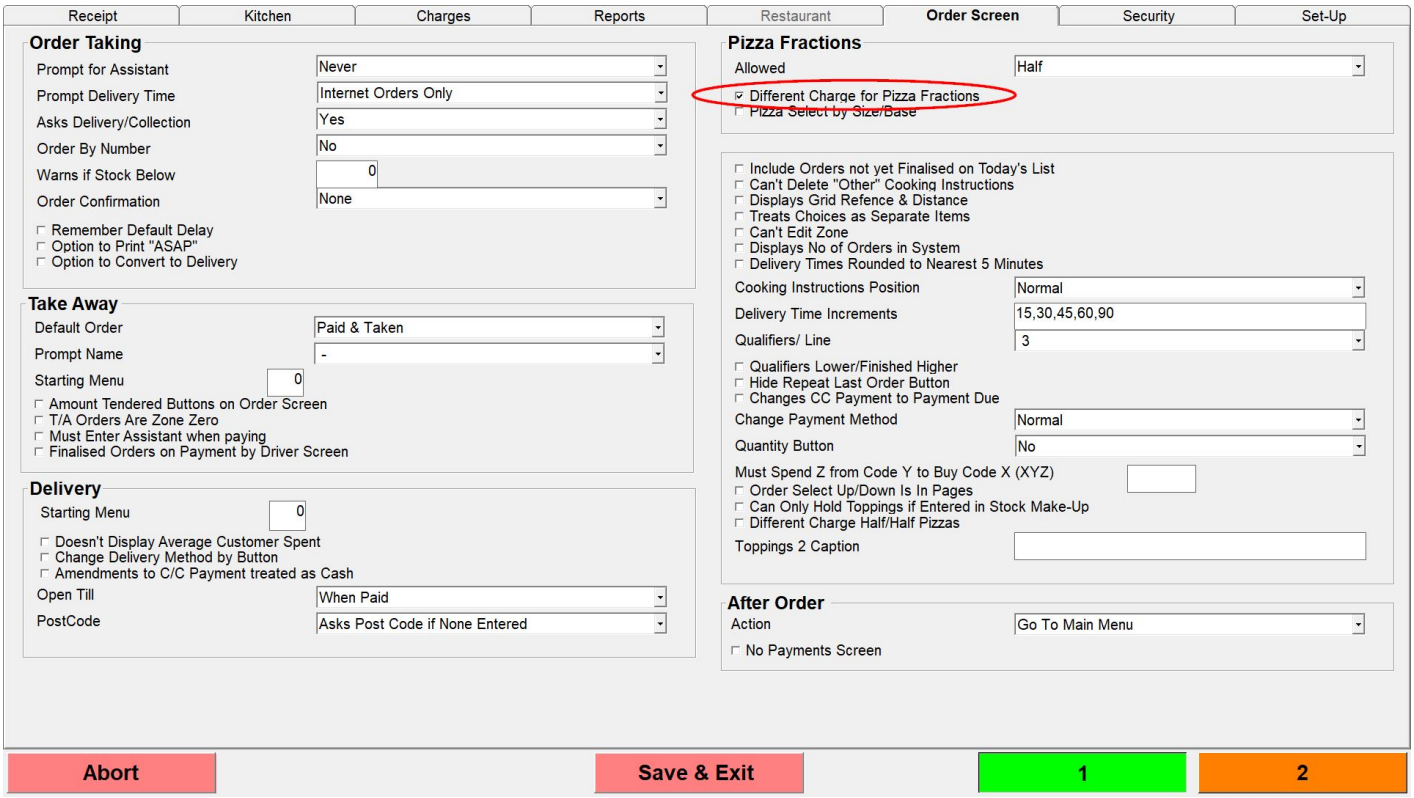

The program defaults to charge for the more expensive of the 2 halves. If you want to add an amount to the standard charge for half and half pizzas if you go into Management and then Occasional Menu and into Menus you will see all the items for your menu. If you click on a pizza size and then the details tab at the top right you will see a place to put in the extra charge for half and half at that size.

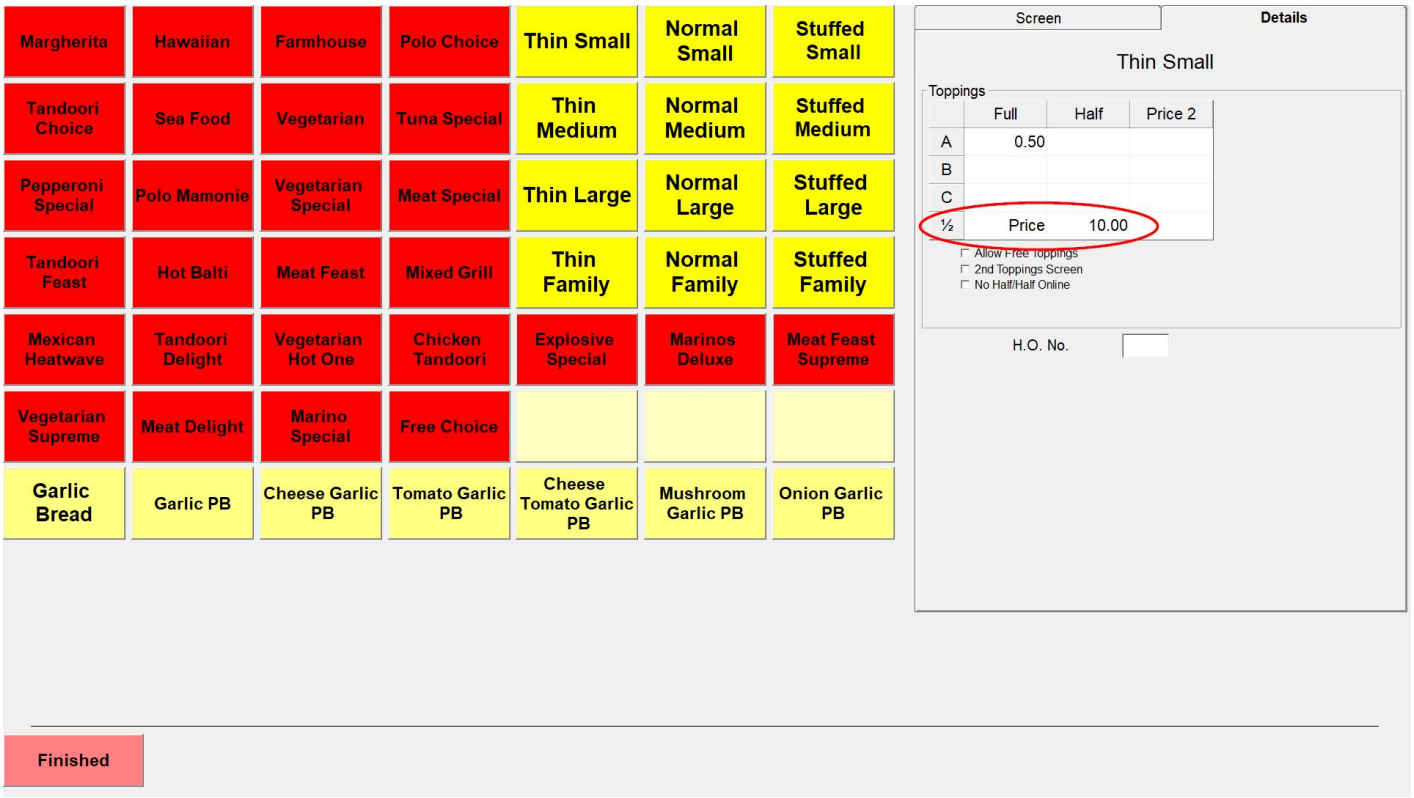

If you charge a flat fee for all half and half pizzas at a certain size there is an option to do this. If

you go into Management then the Occasional Menu and then Options and press on the Order Screen tab there is a section at the top right called Pizza Fractions. In here there is an option called "Different Charge for Pizza Fractions" and if this is ticked the program changes the way half and half pizzas are priced.

Now if you go into Management and then Occasional Menu and into Menus you will see all the items for your menu. If you click on a pizza size and then the details tab at the top right you will see a place to put in the charge for half and half at that size. With the option ticked the wording changes from Extra to Price and when you choose a half and half pizza the price at that size the price will be changed to what has been entered.
